

GILLESPIE & POWERS, INC

DELACQUERING

DELACQUERING SYSTEM WITH G&P MASS FLOW RECIRCULATION PROCESS

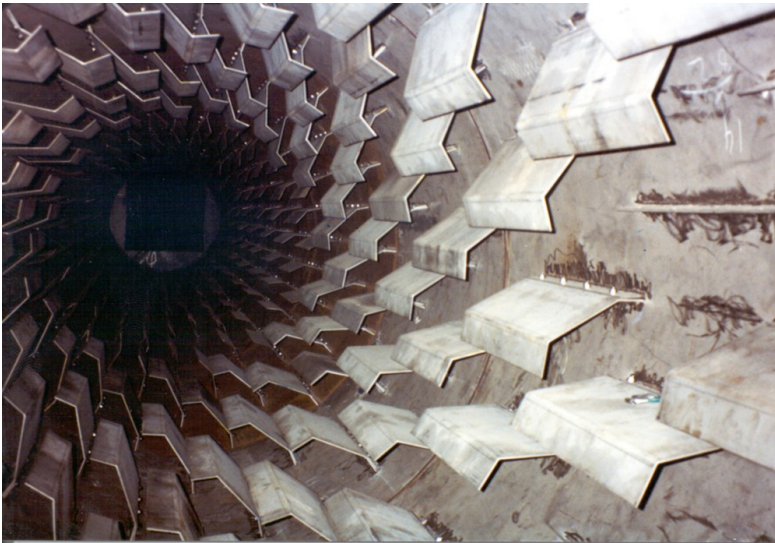

- ◆ Continuous automatic adjustment of system to change in feed rate or composition
- ◆ UBC/Scrap always contacted with ideally conditioned hot gases for no flame impingement and optimum dwell time
- ◆ Primary control loop based on discharge gas temperature which detects significant changes in

In feed rate

Moisture content

Temperature requirements

- ◆ This data adjusts the flow volume from the recirculation fan
- ◆ Complete destruction of VOC's
